

- 47 people took part.(2015, 42)
- 30 different species were seen throughout the village (2015, 26)
- Average number of species/garden: 8.78 (2015, 8.95).
- Greatest number seen in one garden: 16 (2015, 14).
- Smallest number seen in one garden: 2 (2015, 3).
- Proportion of gardens where no finches were seen is growing. Out of 47 there were 27 with none. (2015, 19/42; 2012, 21/52).
- Starlings seem to be expanding their area. Up to 2015 a line could be drawn along Mead Way and starlings were seen in numbers from there up to Champion. This year the line is along High Street on the side of the odd numbers and extending along Camp Hill. From there to West End, starlings are seen only in ones and occasionally twos.
