completely each year when Standards are grouped. Mental Arithmetic still needs increased attention.

The Master, who is an enthusiast in Electrical Science, has, with remarkable skill, fitted up an installation of wireless telegraphy, which affords a permanent Object Lesson to the scholars. The Morse Code is taught to all Classes above the Infants and an hour or more per week is spent in translating it. Without discouraging, it is hoped, the zeal of the Master, it may be pointed out that the time so spent is out of proportion to the educational value of the exercise, and it will probably be advisable to discontinue it in the lower Classes, and reduce considerably the time devoted to it in the upper. It would be well to endeavour to interest the scholars in Nature Study, including the animal and plant life in the

neighbourhood, and to encourage them to carry on investigations for themselves out of School.

It is to be regretted that there is no School library.

The Infants are kindly and carefully taught and are making fair progress. The course of instruction for the youngest children should follow the lines indicated in Article I b of the Code

The Infants' room has now been divided by a glazed partition, and a fireguard has been provided in the main room. The drainage and surface of the playground still need attention.

Despatched 2 Jun 1913

Ernest W. Harrison.

Chairman of Managers.

The Chairman of the Board wished me particularly to point out that he only received the Report this morning, and therefore the delay in entering it in the Log Book is not through our fault.

1913

October 30th

Explanations, etc, with regard to the Report:-

(a) The Geography and Observations were at once altered.

(b) Increased attention has been given to Mental Arithmetic in each class

(c) On Mr M.I.'s verbal representation and advice, I at once struck out the teaching of Morse Code in Std I & II, and have only placed it in Stand III in the latter part of the School year.

(d) We are doing our best to carry out the suggestions as to Nature Study. For many years the ½ hr's lesson on Tuesday afternoon has never been neglected. We also do our best to carry out the experiments connected with the subject. The children are encouraged to bring me accounts or notes of anything they may observe in Nature Study; and we are endeavouring to carry out the Calendar as suggested.

(e) To visit the Infant School a few minutes daily.

In order to carry out the Nature Study work more thoroughly, I have selected twelve of the older children to record their observational work in special books.

Nov 3 W. Norris (C.C.) visited to day, and assisted me in weighing the children for the Medical Officer

6 Dr Mason spent the greater part of the day in and about the Schools.

7 Mrs Lowe in about an hour or so on School business

10 Miss Alice Hewitt of Northampton has commenced duties in the Infant School to-day (on supply). Miss Kathleen Wright went to Wellingborough to-day to undergo the necessary training.

17 W. C. Lovell, a member of the Board, called this morning to examine the roof and ceiling

18 W. Norris visited this morning.

20 Examined the registers & found them quite correct. Ernest W. Hannis,

1913

Nov 23 As the Claims for Medals, referred to in the Log Book (Page 117. Apl 19) seem to have miscarried, I have, in response to instructions from the Secretary, filled up a second set of Forms, and sent off to W. Norris, Clerk of the District.

25 Again sent of Claim for Medals, as one was unsigned by Chairman of Local Board.

Dec 2 W. Norris visited

3 Sent in Form M. D. Sp 3, relating to the three children whose eyes were found to be defective

4 The Rev. E. W. Harrison visited

13 W. Norris, attendance officer, visited

19 The School closed to-day for the usual fortnight's Xmas Holidays, to re-open on Jany 5th
